

7 universal laws

Your body is a tool, it can be used to create vibrations. When you select a thought, and put it into your subconscious, your body will respond. Listen to your strong heart. But try using these Universal laws in this way... "Although the world might be big, it can always fit in your heart." - Vin Diesel.

When something good is happening, and you like it, you can absorb it by feeling good. Try feeling thankful or lovely. Make these feelings, by focusing on things or people which you love or are thankful for.

The Law of Perpetual Transmutation of Energy

This law simply means that thoughts are always turning into their physical counterparts.

When you have a goal, check how it is doing, and how far away it is from becoming reality.

You can always ask someone else, how their goals are doing, and find out what the end result is. Choose if you want to co-operate or not. If it harms people though, you can help to end it.

The Law of Rhythm

The Law of Rhythm states that everything happens in cycles. Orderly in fashion, what might be a bad time in the now, will soon turn into a good time. It is as natural as the cycle of the sun, it rises and falls. The tides come in and out.

Perseverance might be the best take away for this law, as if you are not attracting what you want, you might just be a thought away from being in the right vibration.

The Law of Relativity

Things are as they are, and are different from each other only when you compare them. Relativity makes it possible to classify things as good or bad. Big or small. Like polarity, where there is always an opposite, but with this law, things can be described even further.

Know that you can always say you are having a great time no matter how bad it is. When you say that you are glad it is not worse. Remember, you are no good to the world if you are depressed

The Law of Vibration

Everything is Vibrating, nothing rests. By changing your thoughts, you can change your vibration or "feeling." The Law of Attraction states, that your vibration will attract all things which are on the same level of your feeling. Anything which is not vibrating this way, will repel. You can always change your own vibration, to attract something better at anytime.

The Law of Polarity

It can not be more true, that for everything in this world there is its equal opposite. They can not exist without each other.

There is no dark without light, and no inside without an outside. Even a tree has its opposite, its roots which you cannot see. There are no problems with no solution.

If what you are doing is making you unhappy, there is something you can do to make yourself grateful.

The Law of Cause and Effect

Everything you do, think or feel has a cause and effect. If you understand this you, can have the effect that you want by knowing the cause of it (usually a thought). Find out what it is, and execute it.

The Law of Gender

Every seed takes a male and female counterpart working together. Thoughts are seeds, and they will bear fruit when the time is right.

Helping people out who are carrying an unwanted seed is as easy as finding who or what was the co-creator.

Even More fun can be had when you present a seed to a cooperative couple for appraisal :)

For visual people, "picturing it" is not enough, and in this case, you can take their seed and split the male and female parts to make co-incidence.
